

Data Engineer (m/f)

Our client is one of the leading providers of do-it-yourself websites. In more than ten years, our client has built a substantial and loyal customer base that has created over 20 million websites in 8 supported languages around the globe. The company combines startup speed and passion with the cash flow and market presence of an established company. The target group of our client are small and medium sized companies as well as NGOs, clubs and small governmental institutions. We are seeking a data engineer who will work with the ambitious team of our client and take their data infrastructure to the next level to help make their customers even more successful.

Responsibilities

- Shape and execute a technological mid and long term vision for data engineering with the team
- Provide data in a reliable and efficient way to the stakeholders by keeping the data warehouse and all incoming and outgoing data streams running and up to date
- Help improving the product by finding and implementing new ways of using data
- Research and implement a new and advanced tech stack
- Build and improve software solutions to support the work of Data Analysts and other teams in their daily work
- Define processes and contracts for providing clean and unified data

Requirements

- Degree in Computer Science / Data Engineering, Backend Engineering or similar
- At least 2 years of experience in Data Engineering
- Knowledge and experience in distributed systems (e.g. Kafka) and database architecture
- Skills in building and maintaining software components and infrastructure, especially AWS Stack
- Demonstrated ability to process complex information and dependencies in a continuously evolving environment
- Knowledge of statistics is a big plus
- Strong communication skills for finding simple and solid solutions
- Positive attitude towards problem solving
- Focus on automation and simplicity
- Ability to break complex problems down into manageable chunks
- Drive to get things done
- Solid spoken and written English communication skills

We are offering a position for people who are motivated and excited to keep building our client into a customer-centric, efficient, risk-taking, and highly innovative company. If you are looking for a unique professional opportunity, have a good sense of humor, and like to work with other positive, empathetic, and driven people who want to make a difference in the world, our managing director Matthias Busold is available for a first exchange of ideas. We assure you complete discretion as well as the consideration of non-disclosure notices. You are invited to send your

meaningful application documents with salary requirements and availability by stating no. **BC 100062** to enikoe.holm@busold-consulting.de.
